

WCH 10: Symposium S19. Reducing unsustainable and illegal trade in reptiles and amphibians

A Committee that is working on planning a Confiscation and Repatriation breakout session (one of the follow-up sessions for Symposium: S19. Reducing unsustainable and illegal trade in reptiles and amphibians) at the 10th World Congress of Herpetology has developed an informal survey that will help us guide the format and content of the session. We hope that session participants can complete the survey but also invite others with knowledge and experience related to confiscation/seizure and repatriation of reptiles and amphibians that are not attending the symposium to complete the form. This will assist us with developing a productive session that addresses the biggest needs and interests and will also help us to determine what tools or resources we can develop after the symposium.
